

SAS/STAT[®] Version 9: Progressing into the Future

Maura Stokes, SAS Institute, Cary, NC

Abstract

Version 9 of SAS/STAT software delivers a wealth of tools and functionality for statistical modeling and data analysis. Areas covered by new or enhanced software include multiple imputation, conditional logistic regression, robust regression, general linear models for proportional hazards, regression diagnostics, survey data analysis, power and sample size analysis, statistical distance computations, statistical graphs, and parallelization.
