

# **Pipeline Parallelism Performance Practicalities**

**Michelle Buchecker, SAS Institute, Cary, NC**

## **Abstract**

Pipeline parallelism is a great new feature of SAS 9. This presentation will describe what pipeline parallelism is and how it differs from traditional SAS operations. The purpose of pipeline parallelism is to increase your speed of your program and decrease your I/O operations. This paper will take you behind the scenes to show you what's going on and focus on what NOT to do that could actually cause your program to behave improperly.
