Benefits of sasCommunity.org® for JMP® Coders

Charles Edwin Shipp, Shipp Consulting, San Pedro, California
Kirk Paul Lafler, Software Intelligence Corporation, Spring Valley, California

Abstract
The benefits of sasCommunity.org to SAS® users are available to JMP® users also, but participation has lagged. This is partly due to excellent JMP websites including their discussion groups. Reasons for increased JMP participation on sasCommunity.org are illustrated and discussed, including the interchange of data, statistical and graphics, between SAS and JMP software. The benefit of a community to have your work known and also to help newer users will become increasingly more important as JMP users support sasCommunity.org as its popularity grows.

Introduction
sasCommunity.org is where SAS and JMP users can collaborate with others around the world. It is by users and for users, with emphasis on articles that can include ongoing development. Like an encyclopedia created by the best JMP and SAS users, it includes the best practices as they evolve. With the increased interaction between SAS and JMP applications there will be a greater exchange in sasCommunity.org. Both packages are adding new capabilities, including file exchange.

Background
JMP is designed for data visualization and discovery with statistical graphics. It is a package that started smaller than the expanded SAS package, but due to hardware and software advances is now able to stand alone in robust statistical analysis and presentation.

Sometime after SAS-L became mature, there was also a JMP-L for collaboration. It lasted a few years but the number of participants was not large enough to sustain itself. Now there is a blog for JMP users, but participation in sasCommunity.org will bring collaboration with those using both JMP and SAS. As the packages use the capabilities of the other there will be greater interchange on the website in common, see Figure 1. Remember that, “JMP and SAS are products by the same company.” sasCommunity.org brings both of them together.

Now:
The sasCommunity.org Main Page
To get the most from sasCommunity as well as the numerous features within, you’ll want to become familiar with the Main Page, shown in Figure 2. The Main Page is the primary interface that users see as they access and interact with sasCommunity.org. The first thing you will notice about the main page, besides the beautiful graphics, is that it is organized into a number of parts: 1) on the left side is a grouping of hyperlinked keywords related to the main menu, page activity, getting started, search, and toolbox; 2) at the very top-right are two hyperlinks, Log in and Create account; 3) at the top are a grouping of special tabs related to articles, discussions, view source, and history; 4) in the body portion are the Bloggers’ Corner and Forums; and 5) at the bottom of the body portion are a number of icons related to joining sasCommunity, getting involved, Sasopedia, events and user groups.

Joining sasCommunity – Creating an Account
At some point during your online experience, and particularly before you are permitted to contribute to sasCommunity, you will need to create an account. To create an account you will need to click the “log in / create account” hyperlink located at the top-right of the Main Page. This will automatically display the Log in / create account special page, see Figure 3. Click the “Create an account” hyperlink to proceed. The Log in / create account page will automatically display.

![Figure 3. Log in / create account special page](image)

With the Create account page displayed, you are now ready to enter a unique Username, password, E-mail address, and optional Real name. Once this information is entered, click the Create account button, see Figure 4. Note: Although an e-mail address is required to be entered, an entry for Real name is optional and can be left blank. A password is your secret sequence of typed characters and is required for accessing your account. Anyone who knows your password can sign on to your account and could potentially cause a world of havoc such as deleting mail messages, sending bogus messages that look like they are coming from you, post messages on public forums that appear to be coming from you, and so on. Also, don’t choose a password that is too obvious or too easy to guess. Because a password is so important, you should really select one with the utmost care.
If your account is successfully created, a special Welcome message will display indicating that your account has been created, see Figure 5. You can then click the Return to Main Page hyperlink to display the Main Page.

As part of the verification process, an e-mail containing a confirmation code is automatically sent to the e-mail address you provided during the account creation process. Before you can activate e-mail activities on sasCommunity you will need to open the link displayed in the e-mail by clicking the listed hyperlink, see Figure 6.

After clicking the hyperlink displayed in the e-mail, a confirmation page will automatically display indicating that the account belongs to you. As soon as this confirmation page displays sasCommunity e-mail features will be enabled, see Figure 7.
**Blogger’s Corner**

Blogger’s Corner displays a list of Blogs or articles defined by SAS users. You can access Blogger’s Corner from the Main Page by clicking the “Blogs” keyword hyperlink under the Main Menu category. Or, click the hyperlink, **Visit Blogger’s Corner** to see what your sasCommunity.org colleagues are blogging about, located in the Blogger’s Corner section of the Main Page. Once clicked, the Blogger’s Corner page appears, see Figure 8.

Accessing a blog is as easy as point-and-click. For example, click **“SAS Global Forum”** from the list of Contributors Blogs in the right panel to display the blog for SAS Global Forum, see Figure 9. Once the blog is accessed (and you are logged in), you will be able to participate in the discussion associated with that blog by clicking the ‘discussion’ tab located at the top of the page.

Exploring Popular Links
sasCommunity.org provides a number of popular links for users to access and explore. Click the “Popular Links” keyword from the hyperlinks located at the left of the main page to display the Popular Links page, see Figure 11. This listing of popular links is organized as a collection of frequently accessed pages for ease of use.

Figure 11. Popular Links page
Exploring Upcoming Events
SAS users have a convenient way to find out about upcoming events including user group meetings, conferences, training classes, webcasts, and other interesting events relevant to the user community. Click the “Events” keyword hyperlink under the Main Menu category to display the Events page, see Figure 12.

![Figure 12. Events page](image)

Using the Sasopedia
The Sasopedia is the place where users can access factual information and tips on using the SAS software. To access this fact-based resource, click the “Sasopedia” keyword hyperlink under the Popular Links category to display the Sasopedia page, see Figure 13. Although Sasopedia is currently being reorganized, it displays the following categories: 1) Language Elements, 2) Procedures, 3) Products, and 4) Topic for user convenience.

![Figure 13. Sasopedia page](image)
Staying Connected with User Groups

Users can access the latest goings-on with in-house, local, regional, and SAS Global Forum anytime, and anywhere. To access this fact-based resource, click the “User Groups” keyword hyperlink under the Popular Links category to display the User Groups page, see Figure 14.

![User Groups Page](image)

Figure 14. sasCommunity User Groups page

Using the Search Feature

The built-in search feature lets you search topics on anything SAS, and/or SAS-related topics. In the Search dialog box, located on the left side of the Main Page, character-string information can be entered, and either the Go or Search buttons clicked. For example, say you are searching for anything ‘consulting’ as illustrated in Figure 15.

![Search Dialog Box](image)

Figure 15. Search dialog box

Results matching the user-supplied character-string ‘consulting’ are automatically displayed and grouped as Article title matches and Page text matches. A partial listing of results for ‘consulting’ is displayed in Figure 16.
Logging-out of a Session

Our quick tour of sasCommunity.org would not be complete without showing you how to log out (or sign out) of the virtual community. Although you probably have already guessed how to do this, we thought we would complete our tour and show you how anyway. Logging-out of a session requires you to click the Log out hyperlink that is located at the very top of any page in sasCommunity.org. Once clicked, the following Log out page displays as illustrated in Figure 17.

![Log out page](image)

**Figure 17. Log out page**

Conclusion

The overlap of SAS and JMP will bring increase activity within sasCommunity.org. By learning to maximize the features of the “hub of all things SAS,” JMP users will benefit themselves and others who will see the benefits of statistical graphics and analysis using JMP. The inclusion of the recent packages JMP Genomics and JMP Clinical Trials will only accelerate interchange.

About the Authors
Charles Edwin Shipp is a programmer, consultant and author, and has been using the SAS and JMP software since 1980. He is credited in the original JMP manual for his roles in the early days. He has written more than one hundred papers and has been an invited speaker at more than one hundred International, regional, local, and special-interest SAS and JMP conferences and meetings, and is the recipient of 10 “Best” contributed paper awards. Charlie is the co-author of three books including the ever-popular Books by Users (BBU) book, Quick Results with SAS/GRAPH Software. Currently, Charlie is involved as an eBook author, sasCommunity.org Advisory Board member, application developer, consultant for Trivani Foundation International, and consultant in JMP and JMP Genomics.

Kirk Paul Lafler is consultant and founder of Software Intelligence Corporation and has been using SAS since 1979. He is a SAS Certified Professional, provider of IT consulting services, trainer to SAS users around the world, and sasCommunity.org Advisory Board member. As the author of four books including PROC SQL: Beyond the Basics Using SAS, Kirk has written more than four hundred peer-reviewed papers, been an invited speaker and trainer at more than three hundred SAS International, regional, local, and special-interest user group conferences and meetings, and is the recipient of 17 “Best” contributed paper awards. His popular SAS Tips column, “Kirk’s Korner of Quick and Simple Tips”, appears regularly in several SAS User Group newsletters and websites, and his fun-filled SASword Puzzles is featured in SASCommunity.org.
